

**SANDWELL METROPOLITAN BOROUGH COUNCIL**

**CONTROL OF POLLUTION ACT 1974**

**DISPOSAL LICENCE**

Sandwell Metropolitan Borough Council in pursuance of the powers conferred by the Control of Pollution Act 1974, hereby license Haz Waste Services Ltd, New Villa, Bullock Street, West Bromwich, B70 7HE (hereinafter called the "licence holder") to operate a waste transfer and metal recovery facility on land at Bullock Street, West Bromwich, B70 7HE which is shown edged red in the drawing attached to this licence, being land occupied by the licence holder.

This licence is granted subject to the conditions set out in the schedules attached hereto.

Dated this                    10<sup>th</sup>                    day of November 1993

signed.....  
Director of Environmental and Consumer Protection

The licence holder's attention is drawn to the notes overleaf

**ENVIRONMENTAL PROTECTION ACT 1990  
SECTION 37**

**WASTE MANAGEMENT LICENCE NO SL 1325  
MODIFICATION NO 2  
SHEET 1 OF 20**

**Notice of Modification of Waste Management Licence Conditions**

To: Haz Waste Services Limited  
Bullock Street  
West Bromwich  
West Midlands  
B70 7HE

**Whereas** on 10 November 1993 Sandwell Metropolitan Borough Council granted a Disposal Licence relating to a transfer station at Bullock Street, West Bromwich, West Midlands, subject to the conditions set out therein, as subsequently modified on 29 April 1994.

**AND WHEREAS** you applied to the Waste Disposal Authority to modify the said conditions.

**NOTICE IS HEREBY GIVEN** that **SANDWELL METROPOLITAN BOROUGH COUNCIL** modifies the said conditions as follows:

**DELETE** Schedules A, B and C and the drawings set out in the licence and Modification No 1.

**SUBSTITUTE** Schedules A, B, C and D and the drawings set out in Modification No 2 attached to this notice.

Such Modification shall take effect on 16 February 1996 at noon.

Dated this 15 day of February 1996.

Signed \_\_\_\_\_  
Director of Environment and Development Services

**Notes**

This modification relates to the requirements of the Environmental Protection Act 1990 for the deposit, keeping and disposal of waste only, subject to any conditions set out in the schedules, and does not constitute a consent required by any other legislation. In particular it is the responsibility of the licence holder to comply with any requirements of the Health and Safety at Work etc. Act 1974, the Radioactive Substances Act 1993, the Town and Country Planning Acts and all relevant environmental health legislation.

It is also the responsibility of the licence holder to comply with the requirements of the Water Resources Act 1991 and the Water Industry Act 1991, which control the discharge of drainage to controlled waters and public sewers. Discharges made without a consent under the relevant Act may represent an offence under that Act. Further advice on water protection legislation may be obtained from:-

National Rivers Authority (Severn Trent Region),  
Sapphire East,  
550 Streetsbrook Road,  
Solihull  
B91 1QT

Your attention is drawn to the provisions of Sections 33-34, 38-43 59 and 64-66 of the Environment Protection Act 1990.

**Section 33**

Prohibits under penalty the deposit, treatment, keeping or disposal of controlled waste in or on any land otherwise than in accordance with the terms of a Waste Management Licence. This section applies to all of the conditions contained herein, including any which may be the subject of appeal to the Secretary of State under Section 43 of the Act.

A person who contravenes Section 33 subsection (1) or any licence condition shall, subject to subsection (7), be guilty of an offence and liable on summary conviction to imprisonment for a term not exceeding 6 months or a fine not exceeding £20,000 (at the date issue of this modification) or both, or on conviction on indictment to imprisonment for a term not exceeding 2 years or a fine or both, or in relation to special waste for a term not exceeding 5 years or a fine or both.

**Section 34**

Places a duty of care on any person who imports, produces, carries, keeps or disposes of controlled waste to take all such measures applicable to him as are reasonable in the circumstances to prevent any other person contravening Section 33, and to prevent the escape of waste from his control or that of any other person, and, on the transfer of the waste, to ensure that it is only to an authorised person and that a written description is transferred with it.

A person who contravenes Section 34 subsection (1) shall be guilty of an offence and liable on summary conviction to a fine not exceeding £5,000 (at the date of issue of this modification) or on conviction on indictment to a fine.

**WASTE MANAGEMENT LICENCE NO. SL 1325  
MODIFICATION NO. 2  
SHEET 3 OF 20**

**Section 38**

Provides for the Waste Regulation Authority to revoke or suspend all or part of a licence if the licence holder has ceased to be a 'Fit and Proper Person' or activities authorised by the licence have caused or are about to cause pollution of the environment, harm to human health or serious detriment to amenity of the locality, and the pollution, harm or detriment cannot be avoided by modifying the conditions.

A person who contravenes Section 38 subsection (9), without reasonable excuse, shall be guilty of an offence and liable on summary conviction to a fine not exceeding £5,000 (at the date of issue of this modification), or on conviction on indictment to imprisonment for a term not exceeding 2 years or a fine or both, or, in relation to special waste to, respectively, imprisonment for a term not exceeding 6 months or a fine of an amount not exceeding £5,000 (at the date of issue of this modification) or both, or imprisonment for a term not exceeding 5 years or a fine or both.

**Section 39**

If a licence holder wishes to surrender his licence, he must apply on the prescribed form to the Waste Regulation Authority (enclosing the prescribed fee) which will only accept the surrender if it is satisfied that the condition of the land is such that it is unlikely to cause pollution of the environment or harm to human health as a result of the use of the land for the treatment, keeping or disposal of waste.

**Section 40**

If a licence holder wishes to transfer his licence to another person ("the transferee") the licence holder and the transferee shall make a joint application to the Waste Regulation Authority (enclosing the prescribed fee) which will not effect the transfer unless it is satisfied that the transferee is a Fit and Proper Person.

**Section 41**

Provides for a scheme of charges which are payable in respect of the subsistence of a licence and, on application, for modification, transfer or surrender of a licence. Non payment of the subsistence charge may lead partial revocation of the licence.

**Section 42**

If it appears to the Waste Regulation Authority that a condition in a licence is not being complied with, the authority may require the licence holder to comply with the condition and if he fails to do so revoke, partially revoke or suspend the activities to which the licence relates.

**WASTE MANAGEMENT LICENCE NO. SL 1325  
MODIFICATION NO. 2  
SHEET 4 OF 20**

**Section 43**

Provides for the applicant for a licence or modification to appeal against all or any of the conditions in a licence or modification to the Secretary of State, or for a licence holder to appeal against any revocation or suspension of all or any part of a licence or modification to the Secretary of State.

Appeals must be notified within 6 months of the date of effect of the licence or modification. The Secretary of State has power to allow a longer period for the giving of notice of an appeal but he will not normally be prepared to exercise this power unless there are special circumstances which excuse the delay in giving notice of an appeal. A copy of the form on which notice of an appeal may be given is available from:-

The Planning Inspectorate,  
Room 10/13,  
Tollgate House,  
Houlton Street,  
Bristol  
BS2 9DJ

Tel: 0117 987 8812  
Fax: 0117 987 8406

**Section 59**

The Waste Regulation Authority is empowered to require the removal of any controlled waste deposited in breach of Section 33 subsection (1), or to require the undertaking of such works as are required to reduce or eliminate the consequences of such deposits.

**Section 64**

The licensing authority is required to maintain a register of current or recently current waste management licences granted by the authority, associated working plans, and matters relating to the transfer, modification, revocation, suspension and supervision of licences. Members of the public have free access to this register and may obtain copies of entries in the register.

**Section 65**

The Secretary of State may direct the licensing authority to exclude certain information from the public register in the interests of national security.

**Section 66**

Provides for a licence holder to identify information submitted to the licensing authority as being commercially confidential and to apply for that information to be excluded from the public register. The authority will determine whether the information is commercially confidential and notify the licence holder accordingly. The licence holder has a right of appeal to the Secretary of State if the authority refuses to exclude the information from the public register.

Attached drawings	

**WASTE MANAGEMENT LICENCE NO. SL 1325  
MODIFICATION NO. 2  
SHEET 6 OF 20**

**Schedule A**

**Conditions relating to the facility**

1.
  - (a) A working plan shall be prepared by the licence holder. The working plan shall detail how the facility is to be prepared, developed, restored and completed, and shall describe at all times how the facility is to be operated and how the licence holder will meet all the requirements of the licence conditions.
  - (b) No waste shall be deposited at the facility until the working plan has been approved by the Waste Regulation Authority (the WRA) insofar as it relates to matters where any change to the working plan requires approval in accordance with condition 1 (c) of this schedule.
  - (c) Where required by the licence, full details of any change to the working plan shall be notified in writing to the WRA not less than 28 days before the proposed change is anticipated to take place. Any such change shall not be implemented without prior written approval of the WRA.
  - (d) Full details of any other change to the working plan shall be notified in writing to the WRA immediately.
  - (e) Subject to the terms of the licence the facility shall be operated in accordance with the most recent version of the working plan.
2.
  - (a) The types of waste deposited and kept at the facility shall consist of only those listed in Condition 1 of schedule B of the licence.
  - (b) The types of waste deposited and treated at the facility shall consist of only those listed in Condition 2 of Schedule B of the licence.
  - (c) There shall be no treatment of waste at the facility other than the bulking up of compatible wastes, the segregation of wastes not permitted by the licence, the crushing of empty used metal containers, the crushing of fluorescent light tubes and the crushing of unused pharmaceuticals.
  - (d) Liquid waste shall be received at the facility only in containers with a capacity of no more than 1,000 litres.
3. Waste shall be deposited at and/or removed from the facility between the hours of 0730 and 1800 daily Mondays to Fridays, between the hours of 0730 and 1600 on Saturdays and between the hour of 0830 and 1400 on Sundays. Except in circumstances of emergency no waste shall be deposited at and/or removed from the facility outside these hours without the prior approval of the WRA. All circumstances of emergency shall be reported to the WRA forthwith and confirmed in writing within 3 working days.

**WASTE MANAGEMENT LICENCE NO. SL 1325**  
**MODIFICATION NO. 2**  
**SHEET 7 OF 20**

4. Lighting shall be provided, maintained and used so as to facilitate operations which are carried out during the hours of darkness, as defined by the Science and Engineering Research Council, and those operations carried out inside the buildings of the facility.
5. The facility shall be manned and supervised by a minimum of 2 persons, including a person competent to carry out the checks/tests required by the licence, whenever treatment and/or transfer activities and/or maintenance operations involving waste handling are taking place.
6.
  - (a) An identification board of durable material and finish shall be displayed permanently at the entrance to the facility. This shall show the licence number of the facility, the name, address and telephone number of the operator and of the WRA, and a telephone number through which a responsible person can be contacted in the event of an emergency occurring when the facility is unattended
  - (b) A "Hazardous Waste Area" notice of the form specified in Schedule D shall be displayed permanently at a location such that it is visible at all times to entering the facility.
7.
  - (a) Gates, walls and fencing shall be provided and used to prevent unauthorised access and/or the unlawful deposit of waste at the facility. Gates and external doors shall be locked whenever the facility is unattended.
  - (b) The entire length of walls/fencing, and gates and external doors, shall be inspected each working day, and any repairs to maintain the standard required by paragraph (a) of this Condition shall be carried out forthwith.
  - (c) Any proposed change to the fencing details shall be only in accordance with Condition 1(b) of this Schedule.
8. The facility shall be surfaced in an impermeable material and maintained in sound condition at all times. Maintenance shall include the emptying of any sumps so that water does not accumulate at the facility.
9. A laboratory shall be provided and equipped to perform the checks/tests required by the licence.
10.
  - (a) Prior to the acceptance of any new waste stream at the facility appropriate checks/tests shall be made on the waste.
  - (b) All existing waste streams that are to continue to be accepted at the facility shall undergo appropriate checks/tests within 12 months of the issue of this modification.
  - (c) After the first checks/tests on waste streams, appropriate checks/tests shall be made on each such waste stream at intervals of no more than 12 months.

**WASTE MANAGEMENT LICENCE NO. SL 1325  
MODIFICATION NO. 2  
SHEET 8 OF 20**

- (d) All information obtained as a result of the checks/tests specified in paragraphs (a), (b), and (c) of this Condition, including details of the checks/tests and the waste producer, shall be recorded on individual copies of the licence holder's control form. These control forms shall be available at the facility for inspection by any representative of the WRA at all reasonable times. A copy of each control form for waste delivered to the facility shall be forwarded to the WRA forthwith, and in any case before the waste is delivered to the facility.
  - (e) The checks/tests detailed in paragraphs (a), (b) and (c) of this Condition shall be sufficient to fully characterise the waste and identify any significant contaminants, and shall show that the waste stream is permitted under the terms of the licence. Only waste streams which the appropriate checks/tests have shown to be permitted under the terms of the licence shall be accepted at the facility.
  - (f) Further checks/tests on any waste stream shall be made at the request of the WRA.
11. (a) Each and every load of waste which enters the facility shall, forthwith and in any case within 1 working day, undergo appropriate checks/tests to ensure that no part of the load is likely, by itself or in combination with any other material at the facility (having regard for the precautions taken at the facility), to give rise to any dust, fumes or odours. Only waste which the appropriate checks/tests have shown to be permitted under the terms of the licence shall be accepted at the facility.
- (b) A person competent to carry out the checks/tests required by paragraph (a) of this Condition shall certify the results of any checks/tests that waste is or is not acceptable for deposit at the facility for keeping and/or treatment. For acceptable wastes this competent person shall give written details of the precautions to be taken in the handling and storage of the waste.
  - (c) Any samples which may have been taken to comply with paragraph (a) of this Condition shall be labelled to identify the waste and kept for no less than 14 days after the waste has been removed from the facility. All such samples shall be available to any representative of the WRA at any reasonable time during that period.
  - (d) Records of the checks/tests and written details in paragraphs (a) and (b) of this Condition shall be kept permanently at the facility and shall be available for inspection by any representative of the WRA at any reasonable time. Copies of all such documentation shall be forwarded to the WRA forthwith.
  - (e) The check/tests detailed in paragraph (a) of this Condition shall be sufficient to show that the waste is permitted under the terms of the licence.
12. Wastes which are found not to be consistent with any pre-delivery check/tests may be deposited at the facility if the check/tests carried out in accordance with Condition 11 of this Schedule show the waste to be permitted under the terms of the licence. The WRA shall be informed forthwith of any such occurrence, and the details of the checks/tests showing the waste to be permitted shall be submitted in writing to the WRA within 3 working days.

**WASTE MANAGEMENT LICENCE NO. SL 1325  
MODIFICATION NO. 2  
SHEET 9 OF 20**

13. (a) All wastes accepted for keeping at the facility shall be deposited in the dedicated skips or containers, the covered storage area, the clinical waste area or the flammable storage area, as appropriate, forthwith and in any case within 1 working day of entering the facility. Thereafter waste shall be removed from these areas only for sorting, bulking up, loading prior to removal from the facility on that working day or to prevent/minimise any circumstances of emergency.
- (b) Notwithstanding paragraph (a) of this Condition waste may be moved from its designated area to facilitate the permanent removal of other waste kept behind it or to facilitate maintenance and/or repairs to the infrastructure of the facility. Any waste moved in such a manner shall be returned to its relevant storage area forthwith and in any case by the end of the working day.
- (c) Wastes shall not be bulked in such a manner that their combined chemical properties give rise to adverse reactions resulting in dust, fumes, odours or fires.
14. Wastes in the form of laboratory chemicals received in full, labelled containers not larger than 10 litres shall be stored in a specially reserved area, and shall be regarded as samples. Samples shall be available for inspection by any representative of the WRA at any reasonable time.
15. (a) Clinical waste, as specified in Schedule B, shall be accepted for keeping at the facility only in suitable bags or containers.
- (b) Clinical waste accepted at the facility, in the form of human tissue, animal carcasses, soiled swabs, dressings and other blood products, shall be deposited forthwith into the segregated area detailed in the working plan, and this area shall be kept refrigerated to a temperature at or below 4° Celsius whenever such waste is being kept at the facility.
- (c) Clinical waste kept in the refrigerated area specified in paragraph (b) of this Condition shall be removed from the facility within 1 working day of receipt at the facility.
- (d) Pharmaceuticals shall be removed from the facility within 3 months of receipt at the facility.
- (e) Sharps shall be removed from the facility within 28 days of receipt at the facility.
- (f) Sanitary disposal waste and autoclaved biological cultures shall be removed from the facility within 4 working days of receipt at the facility.
16. Except in circumstances of emergency no waste shall be deposited at the facility unless prior notice has been received at the facility of its arrival.
17. A record shall be kept of the types and quantities of waste which enters or is removed from the facility, including any waste deemed unacceptable in accordance with Condition 11 of this Schedule. This record shall comprise full details required in the form specified by the WRA and a copy of this record detailing information not previously submitted be sent to the WRA once per month or any other frequency specified by the WRA. This record shall be retained at the facility during the period that the licence remains valid and shall be made available for inspection by any representative of the WRA at any reasonable time.

**WASTE MANAGEMENT LICENCE NO. SL 1325  
MODIFICATION NO. 2  
SHEET 10 OF 20**

18. (a) The quantities of each type of waste kept at the facility shall be less than the limits of the operational and storage capacity detailed in the working plan for that waste.
- (b) The total quantity of waste deposited annually at the facility shall be less than 20,000 tonnes, and the maximum quantity of waste deposited at the facility on any working day shall be less 100 tonnes.
19. Provision shall be made for dealing with any waste which enters the facility but which is not permitted under the terms of the licence. Such waste shall be removed from the facility forthwith and in any case within 3 working days, and either returned to the producer or taken to a suitable alternative facility. The WRA shall be informed forthwith of any such occurrence, and this shall be confirmed in writing within 3 working days.
20. Standby operating and disposal arrangements shall be implemented in the event of a breakdown or any emergency at the facility. The WRA shall be informed forthwith whenever these arrangements are implemented and this shall be confirmed in writing within 3 working days.
21. Bunded areas shall be provided for the storage of all liquid containers. Such areas shall be constructed so that spillages are contained and spillages of incompatible materials are not permitted to mix or react. Each bund shall have an impermeable internal surface and a minimum available capacity not less than 110% of the volume of the largest tank or container within it. A sump shall be provided at the lowest point of each bunded area to facilitate the collection and disposal of all liquids contained therein. Rainwater shall not be allowed to accumulate in bunded areas.
22. Bunded areas shall be cleaned out and sumps emptied and cleaned out prior to the deposit of any waste incompatible with that previously stored.
23. (a) Plant and equipment shall be provided, maintained and used for the handling of containers.
- (b) Only containers for which suitable handling equipment is available and provided in accordance with paragraph (a) of this Condition shall be accepted at the facility.
- (c) Containers, whether containing waste or other materials, shall be stored only in areas which are bunded in accordance with Condition 21.
- (d) Each bunded area, and each container or group of containers, shall be clearly and indelibly marked to show its contents, the number of containers where applicable, the control form number, the bay number, and the acceptance date. Incompatible wastes shall not be stored in the same or adjoining bunded areas.
- (e) Containers of waste or other materials shall be inspected for damage and/or deterioration at intervals of no more than 7 days. Any container which is found to be defective shall forthwith, have its contents transferred to another suitable container or the complete container shall be placed in a sound, larger container. A record shall be kept of any such occurrence.
- (f) All containers used for the storage of any materials which may cause pollution of the environment shall be of a closed construction.

**MODIFICATION NO. 2**  
**SHEET 11 OF 20**

24. (a) Any spillage of liquid or other material within the facility shall be removed forthwith, and either re-packaged or removed from the facility:-
- (b) Disinfection measures shall be implemented whenever a spillage of clinical waste, other than pharmaceuticals, occurs at the facility. A record shall be kept of any such occurrence.
25. No waste shall be burned within the confines of the facility. Any fire occurring within the confines of the facility shall be treated as an emergency and immediate action shall be taken to extinguish it. All outbreaks of fire shall be reported immediately to the Fire Service and the WRA, and confirmed in writing to the WRA within 3 working days. Fire fighting equipment shall be provided and maintained in working order at all times.
26. (a) Wastes and residues shall not be allowed to accumulate at the facility unnecessarily. No biodegradable or putrescible waste shall remain at the facility for a period longer than 48 hours.
- (b) Details of any waste which is likely to remain at the facility for more than 3 months shall be notified in writing to the WRA not less than 7 days before the expiration of the period of 3 months beginning with the date the waste was first deposited or received at the facility.
- (c) The details required by paragraph (b) of this Condition shall include an estimate of the additional time that the waste is expected to remain at the facility, and the reason for the delay in removing the waste.
27. Provision shall be made within the confines of the facility for the parking, loading and unloading of vehicles transporting wastes to and/or from the facility and the prevention of any damage by vehicles at the facility.
28. The facility and its immediate environs shall be kept clean and tidy at all times.
29. Provision shall be made to inspect every working day for, and to deal effectively with, any vermin or insect pests at the facility. A record shall be kept of any treatment undertaken.
30. (a) Odour control measures, including the immediate removal of waste which is giving rise to odours, shall be implemented at the facility.
- (b) Dust control measures shall be implemented at the facility whenever dust is generated at the facility.
31. (a) Measures, including proper maintenance and use, shall be undertaken to control the noise of machinery and vehicles operating at the facility.
- (b) Between the hours of 0800 and 1800 daily Mondays to Saturdays, noise generated within the facility shall not exceed a Rating Level of  $50\text{dB}_{L_{Aeq}(60 \text{ minutes})}$  as measured in accordance with BS4142:1990 at any residential property, and the  $L_1$  level during this period shall not exceed 60dB(A).

**WASTE MANAGEMENT LICENCE NO. SL 1325  
MODIFICATION NO. 2  
SHEET 12 OF 20**

- (c) Between the hours of 2200 and 0600 on the following day, noise generated within the facility shall not exceed a Rating Level of  $40\text{dB}_{\text{LAeq}(5 \text{ minutes})}$  as measured in accordance with BS4142:1990 at any residential property, and the  $L_1$  level during this period shall not exceed 50dB(A).
  - (d) At all other times, noise generated within the facility shall not exceed a Rating Level of  $45\text{dB}_{\text{LAeq}(60 \text{ minutes})}$  as measured in accordance with BS4142:1990 at any residential property, and the  $L_1$  level during this period shall not exceed 55dB(A).
32. (a) A site diary shall be kept at the facility, or the licence holder's adjacent offices in Bullock Street and the following information shall be recorded: -
- (i) plant maintenance and breakdowns;
  - (ii) spillages and emergencies;
  - (iii) incidents involving unacceptable waste;
  - (iv) inspections of drainage, structures and services, and any resultant action;
  - (v) inspections for vermin and insects, and any resultant action; and
  - (vi) inspection of containers; and any resultant action; and
  - (vii) the date and details of any other significant events which affect the waste handling activities at the facility.
- (b) This diary shall be retained at the facility, or the licence holder's adjacent offices in Bullock Street, during the period that the licence remains valid and shall be made available for inspection any representative of the WRA at any reasonable time.
33. (a) All cessations of operations which require the transfer or diversion of wastes deposited at the facility to facilities elsewhere shall be notified to the WRA forthwith and confirmed in writing within 3 working days.
- (b) Any anticipated or actual cessation of operations for a period in excess of 3 months shall be notified to the WRA immediately. Not less than 14 days notice shall be given to the WRA of the date on which operations are to re-commence in the event of such a cessation.

**WASTE MANAGEMENT LICENCE NO. SL 1325  
MODIFICATION NO. 2  
SHEET 13 OF 20**

34. A copy of any notice or instruction received from any authority, other than the WRA, which in any way relates to the use of the facility, shall be given to the WRA within 3 working days of receipt.
35. The terms of the licence and of the working plan, and any approved change to either document, shall be made known to any person who is given responsibility for the management or control of the facility.
36.
  - (a) A copy of the licence, and any subsequent modification, shall be available within the facility at all times where it can be read by the licence holder's employees and any visitor to, or user of, the facility.
  - (b) Instructions to be followed in the event of an emergency shall be displayed permanently at the facility and shall include notification of the WRA and of the National Rivers Authority or Severn Trent Water Limited, as appropriate, when a watercourse or sewer could be affected.
  - (c) A copy of the working plan and any approved change shall be available at all times within the facility where it can be read by the licence holder's employees or any other person authorised to do so.

**Schedule B**

**Types of waste**

1. The types of waste which may be deposited at the facility for keeping shall consist of the following only:-

**Inorganic Acids**

Hydrochloric acid  
Sulphuric acid  
Nitric acid  
Chromic acid  
Phosphoric acid  
Hydrofluoric acid  
Any mixtures of the above.

**Organic Acids and Related Compounds**

All

**Alkalis**

Alkali metal oxides and hydroxides, calcium oxide, proprietary alkaline cleaners  
Ammonia  
Calcium hydroxide  
Sodium and/or potassium carbonates

**Toxic Metal Compounds**

Cadmium  
Mercury  
Lead  
Arsenic  
Mixed toxic metal compounds  
Cobalt  
Copper  
Zinc  
Barium  
Thallium  
Nickel  
Vanadium  
Silver  
Chromium

**Non Toxic Metal Compounds**

Iron  
Ammonium Salts  
Titanium

**Metals (Elemental)**

Cadmium  
Mercury  
Aluminium  
Magnesium

**Metal Oxides**

Cadmium oxide  
Beryllium oxide  
Other hazardous oxides  
Chromium  
Cobalt  
Molybdenum

**Inorganic Compounds**

Sodium and potassium cyanides  
Soluble complex cyanides  
Ferro and ferric cyanides  
Other cyanides  
Sulphides, selenides, tellurides and arsenides  
Chromates  
Fluorides, silicofluorides and borofluorides  
Arsenites and arsenides  
Carbides and acetylides  
Borates  
Nitrites  
Nitrates  
Phosphorous compounds  
Sodium silicate and silicates

**Other Inorganic Materials**

Slag including boiler and flue cleanings  
Mineral processing wastes  
Silt and dredgings  
Water (contaminated)  
Metal scrap  
Others

### **Organic Compounds**

Aliphatic hydrocarbons  
Aromatic hydrocarbons  
Chlorinated phenols and analogues  
Peroxides  
Trichloroethylene  
Perchloroethylene  
Trichloroethane  
Trichlorotrifluoroethane  
Other halogenated hydrocarbons  
Amines and amides  
Nitriles  
Isocyanates  
Other organo nitrogen compounds  
Organophosphorous  
Organo sulphur compounds  
Esters  
Aldehydes and ketones  
Alcohols  
Chelating compounds  
Phthalates

### **Polymeric Materials and Precursors**

Mixed solvents  
Epoxy resins (not finished products)  
Polyester resins (not finished products)  
Phenol formaldehyde resins (not finished products)  
Polyurethane  
Other resins and polymeric materials  
Scrap rubber including tyres  
Latex, latex and rubber solutions and suspensions  
Synthetic adhesive wastes  
Ion exchange resin wastes

### **Fuel, Oil and Greases**

Mineral oils  
Kerosene and derv  
Fuel oil  
Vegetable and other oils  
Oil/water mixtures  
Fats, waxes and greases

WASTE MANAGEMENT LICENCE NO. SL 1325  
MODIFICATION NO. 2  
SHEET 17 OF 20

**Miscellaneous Chemical Waste**

Mixed laboratory chemicals  
Mixed inorganic compounds  
Organics identified by trade name only

**Filter Materials, Treatment Sludge Contaminated Rubbish**

Used filter materials  
Contaminated rubbish  
Empty used containers  
Industrial effluent treatment sludge

**Interceptor Wastes, Tars, Paint, Dyes and Pigments**

Tank cleaning sludge  
Interceptor pit wastes  
Printing industry wastes  
Dyestuffs waste  
Distillation residues  
Acid tars  
Tar, pitch, bitumen and asphalt  
Paint/varnish waste

**Miscellaneous Wastes**

Tannery waste  
Fellmongers waste  
Cellulose waste  
Waste treated timber  
Soap and detergents  
Other industrial wastes

**Animal Food Wastes**

Glue waste

**Clinical Waste**

Pharmaceuticals  
Sharps, needles and syringes, and empty glass bottles and vials arising from medical treatment  
Human tissue, animal carcasses, soiled swabs and dressings, and other blood products  
Autoclaved microbiological cultures  
Sanitary disposal waste

**WASTE MANAGEMENT LICENCE NO. SL 1325  
MODIFICATION NO. 2  
SHEET 18 OF 20**

**Others**

Crushed light tubes  
Paper and card  
Photographic developing solutions

2. The types of waste which may be deposited at the facility for treatment shall consist of the following only:-
  - Empty used metal containers
  - Fluorescent light tubes
  - Pharmaceuticals
3. Notwithstanding the generality of the types of waste specified in Conditions 1 and 2 of this schedule, the following wastes shall be specifically excluded from deposit at the facility:-
  - (a) Wastes derived from experimental processes and which are contaminated with variable pathogenic organisms;
  - (b) Wastes containing Naphthylamine, Auramine, Benzidine, 4-Aminodiphenyl, 4-Nitrodiphenyl, O-Tolidine, Dianisidine, Dichlorobenzidine or Magneta.
  - (c) Percussives and explosives and other substances with similar characteristics, excepting where such wastes are in such a form or state where the percussive or explosive properties are and will remain ineffective;
4. The WRA shall be notified prior to the deposit of any of the following wastes at the facility, and these wastes shall be handled and stored only in the manner detailed in the working plan:-
  - (a) Any wastes with a flash point less than 21° celsius;
  - (b) Any biocides, pesticides, herbicides, fungicides, organophosphorus and organosulphur compounds;

**WASTE MANAGEMENT LICENCE NO. SL 1325  
MODIFICATION NO. 2  
SHEET 19 OF 20**

**Schedule C**

1. In this licence, an emergency is defined as a case where a person has reasonable cause to believe that circumstances exist which are likely to endanger life or health or cause damage to property or pollution of the environment.
2. In this licence, a waste stream is defined as a characterised waste product resulting from a particular production process from a specified producer.
3. In this licence, forthwith and immediately shall mean as soon as practicable.
4. In this licence, a representative of the WRA shall include any officer of the Environment and Development Services Department and any officer of the West Midlands Hazardous Waste Unit.

WASTE MANAGEMENT LICENCE NO. SL 1325  
MODIFICATION NO. 2  
SHEET 20 OF 20

**Schedule D**

In this modification, the “Hazardous Waste Area” notice specified in Schedule A Condition 6(b) refers to a notice taking the form illustrated below, in the colours shown and displaying the waste management licence number and a telephone number through which a responsible person may be contacted in the event of an emergency occurring when the facility is unattended. It shall be 600mm x 450mm in size and shall be made from a durable material with a weather resistant finish.
